

Bay Enhancement Work Group (BEWG)

The Bay Enhancement Work Group provides advice to the Maryland Port Administration (MPA) and its dredged material management program partners on environmental issues related to placement of dredged material.

BEWG members represent resource management and regulatory agencies at the federal and state level, as well as stakeholder groups including fishermen and communities. BEWG meets monthly on the first Tuesday, only as necessary. Staff support is provided by MPA's Harbor Development section and by Maryland Environmental Service.

To contact committee members, send an e-mail to mpasafepassage@marylandports.com or call the Maryland Port Administration at 410-385-4438.
